

# NEE\_VUT\_REF\_RANDOMC, FI-Hyy 1996-2014 -- descriptive characterisation

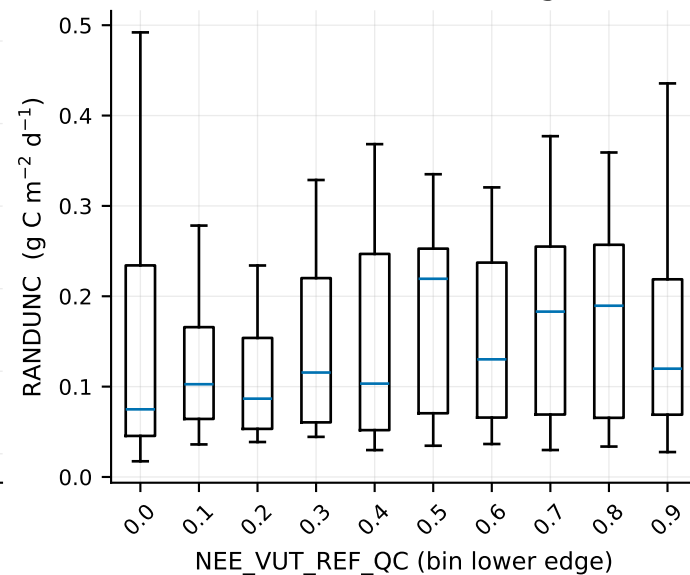

## RANDUNC vs |NEE|

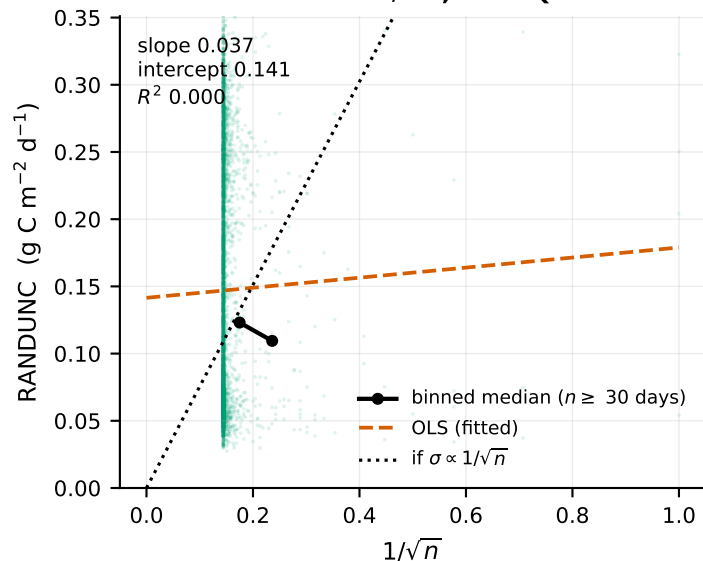

## RANDUNC vs day of year

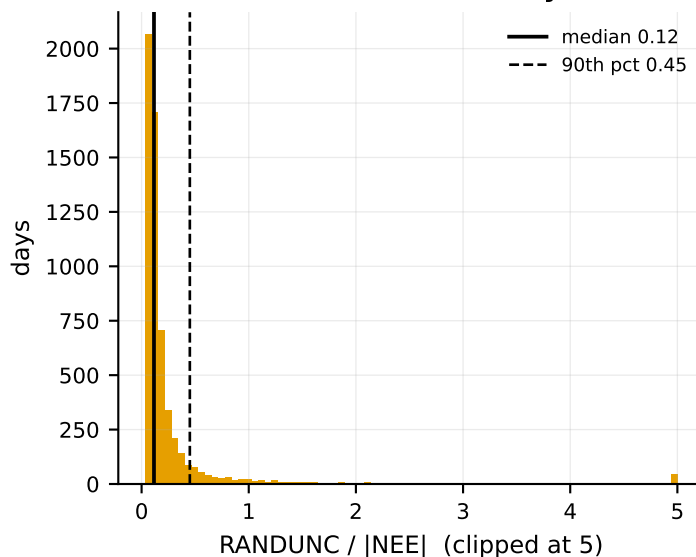

## RANDUNC vs QC flag

## RANDUNC vs $1/\sqrt{n}$ , $n = \text{QC} \times 48$

## relative uncertainty

## audit

|                                               |      |
|-----------------------------------------------|------|
| total days                                    | 6940 |
| valid NEE                                     | 6940 |
| passing QC $\geq 0.75$                        | 6263 |
| RANDUNC missing                               | 1138 |
| RANDUNC zero                                  | 0    |
| QC-passing, no sigma in 1997-2005 calibration | 857  |
| distinct QC values                            | 49   |
| all multiples of 1/48                         | True |
